

ALKALINE WATER MAJOR BENEFITS

Lose Weight:

Alkaline water can help lose weight by cutting in on our fat reserves. Acidity is the main culprit because we tend to store more fat than we require. Our dietary patterns not only include more fat but also more acidic foods that further aggravate the problem of a decreased pH level. We should aim to maintain a pH balance of 7.40 which is slightly alkaline. Drinking alkaline water helps in two ways. One that we hydrate our body as our body is 70% water, and second it helps in cutting down on acidity and then on fat.

Anti Aging:

Water is a good anti aging method and drinking ionized water is even better as it helps reduce acne and eczema apart from other skin problems. Alkaline water forms small clusters that are easy to absorb and they hydrate our body more effectively causing our skin to plump up and age more slowly.

Reduce the Chances of Osteoporosis:

Acidity leaches out calcium and magnesium from our body leading to osteoporosis. To combat this problem, alkaline water can help get rid of acidity by neutralizing it and bringing our body in pH balance. The more we lose important minerals from our body the more our bones and body becomes weak, and we become more prone to osteoporosis. The

easiest step to avoid such a problem is to drink alkaline water.

Build Cardiovascular Health:

Acidic reserves in our body create several health problems like diabetes, kidney stones etc. Poor digestion led by stress and poor dietary habits add to decreased cardiovascular health. Acidic waste builds up and can aggravate this condition. To get rid of this waste, alkaline water can help neutralize the acidity in our body.

Reduce Joint Pain and Arthritis:

Joint pain develops only when our body is acidic. Alkaline water can combat that by regulating our pH balance and thus eliminating free radicals in our body that target joint causing pain and aggravating arthritic pain. Alkaline water has antioxidants that help reduce free radicals in our body.

Reduce Candida:

Along with other healthy bacteria, candida ferments sugar in our body and is present in our bodies for normal health reasons. When yeast proliferation occurs, candida is more in comparison to friendly bacteria in our body leading to a weakened immune system. Alkalinity can help neutralize this condition.

Reduce Infections, Flu and Colds:

Immunity weakens with more and more acidity in our body and thus we fall sick

more frequently. Alkaline water can help build up alkaline reserves and neutralize acids helping our body to recuperate and grow strong.

Detoxify:

Alkaline water has detoxification properties and it helps to get rid of free radicals. It is also easily absorbed as it is less clustered. Detoxification occurs as alkaline water has antioxidants that act on free radicals in our body, built up because of acidity.

Decrease Risk of Cancer:

We have a higher risk of cancer when our bodies are acidic in nature. Doctors promote alkaline water and alkaline dietary habits only to combat these health risks that are associated with acidity. Alkaline water is a good way to combat cancer risk and get rid of acidity reserves in our body. Cancer develops when our body cells become unhealthy and adapt to our body's unhealthy environment when our body is acidic. Alkaline water can help reduce the risk of unhealthy cell growth.

Increase Energy Reserves:

Alkaline water is a reservoir of hydroxyl or OH- molecules that is free oxygen for our body. Our blood stream requires oxygen to provide energy to our body and alkaline water can help provide this much needed oxygen in our system. This means an instant boost in our energy levels.
